No answer: November 17, 2012 at 7:44 p.m., 1) as far as the album, no, I can't predict the future, but I said the same thing when I saw the RED tracklist look like it turned out, this album has even fewer songs and maybe more features, so if you know hip hop then you would guess it won't be a classic or even an album up to the standards of the game, because I see zero content, weak concept and unoriginal features 2) it has a 5album deal with Interscope - after his 5th album Jesus Piece he wants to leave Interscope- so where is he going to go? Seeing him tight with almost the entire YMCMB family - there's been talk of it, and it's not impossible, except when I said he was going to join YMCMB it was also hypothetical and obviously cynical, so think twice be4 you call me ignorant. TV Reference Reply: November 17, 2012 at 11:43 pm Sleep on the street for a few days for a couple J, then you sleep outside forever because you OT sprayed the game spit some real shit in this song, but I get what you say it was some wacky songs on R.E.D. But I don't think it was so bad as people say it is. I like almost all of rap music except a handful of people like Lil b, French Montana, Gucci and a few others, but when it comes to everyone else, if you stick to your roots then I'll enjoy your music. That's why I see myself looking forward to this album, because I know what I gonna get. Answer: November 18, 2012 at 12:09 a.m., I get what your words are. Don't get me wrong. I'm a fan of the game of course. I'm looking forward to some songs here I am I. As a fan, although there must be a time when you shouldn't lie to lie Yourself. As a fan of the game I look forward to his songs. In this day and age I'm not looking forward to his cds cause he can't do a full LP anymore. Just the way it is sometimes I wish I was wrong lol it doesn't hate either. Good music is one of my favorite major labels, but there album meet the standards for me it's not crap it was super wack lol jus cause theyre one of my favorites doesn't mean ima sit here n dickride them it's my point. When this album goes through, I'll judge. On the bright side he keeps his sh0rt. More chances are that it will be a good album. Can I just be blunt though. It looks to me as a feature more of a strategic thing than a musical Bond thing. Think about it. There's a reason Akon and Kanye never worked together. Now lemm also say this. I know that usually the games feature recording on albums a little more cohesive than most. But when the game comes out performin tracks from this album, what then? Many see Jason Taylor as a free gun of hip-hop, and they may be right. Equal parts passion and madness, the trajectory of the game's career includes serving as the mouthpiece for G-Unit, being the mouthpiece against the G-Unit, and keeping Dr. Dre often doubted the post-detox legacy. The first three albums of the game possessed different attributes of personality leading West Coast. R.E.D. Album is a mixture of all three, where the propensity to punchy, honest verse proves that he has a few more miles of music before you bow out. The album works a bit a bit in length (almost an hour and a half), with all but four songs having at least one feature. Dr. Dre's comment is dispersed throughout, with four short segues detailing the game's three-plus decades of life. The city opens where the game speaks candidly about its past label situations (I was stressed by the fuck, torn between Aftermath, Geffen, Interscope ...), hinting at the future (Either I'm crazy or /Black Slim Shady or/may be the reason that the kid said he would pay me more?). Kendrick Lamar delivers a nearly uttered word hook before blacking out at the end with what sounds like an oath of allegiance to the game. While every other rap vet opposite Kendrick will represent the balance of teacher-student, the insatiable hunger for playing on the microphone makes it sound like a two-student operation. A radio-friendly drug test with Dre, Snoop and Sly oozing major West Coast but overshadowed by a double Lil Wayne follow-up to The Martian vs. Goblins and Red Nation. Weezy only provides hooks for both, which may not be enough for some, but plenty for others. The crap talk about The Martian Vs. Goblin has no limit, with the game suggesting he had sex with Erykah Badu on the set of Window Seat (which he calls that nekkid video shoot) with lines like I was suckin' on that pussy like it was Wonton Soup. Tyler OFWGKTA, the creator chimes on the track, sending a slim shot to Chris Brown (now my future is brighter than Christopher's new haircut). He even pushes the game with And this shit is expected, like Jayceon whenever he calls the drops to which the game intervenes. Fuck You, Tyler. At times on R.E.D. Game switches the sound of his voice, as on his solo track The Good, The Bad, The Ugly, where he sounds like a rough Dr. Dre mixed with Biggie. Could it be a personality switch or just a change of tone? Who knows. Other tracks where the game rides Dolo include Ricky, an ode to Morris Chestnut's fallen character in Boyz N Hood. The song begins with an audio clip of the fatal Hood scene, but as the voice of the game enters about a minute, it shoots: The Bloods of the Slave, the heart of the giant / Had to leave Aftermath. Dre said I was too geeky. The direction of the song is a bit confusing, but serves as a podium for the game, undoubtedly honesty. Features from Rick Ross to Heavy Artillery (with Beanie Sigel) and Young Jeezy to Paramedics as showcase rappers spit as they want a record deal to possibly compete with the aforementioned hunger games. An exception to this formula is Whale, who is on All the Way Gone with Mario, throws deuces into his old style and slides along in his new MMG-drawl. Nelly Furtado turns soulful on Mom Knows, while Chris Brown's breathy hook on a pot of gold will arrive only the second Drake singing hook on Good Girls Go Bad... if he actually sang it. Drizzy rhymes on track as counterweight games discussed good girls and Drake talk Given R.E.D. Album Album up to three years in the making, it has to be the tough job that it is. Despite its delay, it is by no means a swan song, contractually and musically. R.E.D. is a lot of things, only adding to the anticipation already for the final offer of the Game Interscope.
